BRISTLE BRUSH ADVANTAGES

The superior choice for board level interconnects

The Bristle Brush contact has been proven in military avionics packages and meets the requirements of MIL-DTL-55302. It provides high density in tighter spacing which is a main concern for integrated electronics in aircraft systems.

Brush vs. Conventional Contacts

Brush Contact Innovation

- Multiple contact interfaces: Strands of high tensile strength wire are bundled together to form brush-like contacts. By intermeshing two multi-strand wire bundles, an electrical connection is made.
- Provides redundant current paths, 14-70 (point of contact) per mated contact with a gas tight junction.
- Very smooth (low friction) interface

Conventional Pin/Socket

- Machined surface finish on both parts
- Higher friction and wear
- Limited number of contact sites

Amphenol Brush Contact Provides:

- Low mating forces (70% to 90% lower than conventional pin and socket contacts)
- Easy mating/unmating makes high circuit counts practical (25 lbs. typical for 400 contacts)
- Multiple points of contact = superior electrical capability
 - Stable, low resistance-20milliohms max.
 - Redundant current paths
 - Proven electrical and gas tight contact sites
- Severe environment protection
- High current rating
- Long contact life (100,000 cycles of mating and unmating with out performance degradation)
- Documented intermittency-free performance - no 10 nanosecond discontinuities during 50,000,000 cycles of 0.010 displacement
- Overall cost effectiveness (life cycle cost)
- Protection against micro-arcing
- No degradation in a fretting/micro-motion environment

HIGH DENSITY BRUSH (HDB³) SERIES

HDB³ High Density Brush Series with tighter (.070 inch X .060 inch) staggered grid spacing

This new connector series of brush connectors incorporates a higher density contact pattern and lower mated height than Amphenol's standard low mating force rectangular connectors. HDB³ connectors utilize the same durable and reliable B³ brush contact in a tighter .070" X .060" staggered grid pattern. They offer the advantage of higher density in a compact-height connector utilizing less board space. Styles include mother board, daughter board, input/output and stacker.

HDB³ Daughter Board Connector

HDB³ Mother Board Connector

HDB³ MATERIALS

- Insulator: Liquid crystal polymer, 30% glass filled
- Contact: Wire: Beryllium copper per ASTM B197; finish is gold per ASTM B488 over nickel per AMS-QQ-N-290.
- Holder: Brass similar to UNS C33500; available finishes include gold per MIL-G-45204, tin-lead per MIL-P-81728 or tin per MIL-T-10727 (RoHS Compliant).
- Sleeve: Stainless Steel per AMS-5514, passivated IAW QQ-P-35 (Daughter Board, I/O and Stacker connector)
- Keys/Guide Pins: Stainless Steel

HDB³ I/O Connector

HDB³ Stacker

HDB³ High Speed

COMPARISON

COMPARISON

The Amphenol HDB³ Connector offers advantages over competitive connectors:

- Higher density contact pattern
- Uses less board space
- Allows for shorter mated height
- Provides the durability and performance of the Brush contact
- Low cost

	Amphenol HDB ³	Hypertronics HPH	Airborn RM4
Contact System	Brush	Hyperboloid	Pin & Socket
Durability, Mating Cycles	100,000	2,000	500
Contact Mating Forces, Ounces	1.5	1.5	2.5
Mother Board	.070 X .060	.075 X .075	.075 X .070
Daughter Board	.070 X .060	.075 X .100	.075 X .100
Connector Width	.350	.443	.400
Mated Height, MB to 4th row of DB	.680	.986	.915

HDB³ AND HSB³ FEATURES AND BENEFITS

PERFORMANCE

CONNECTOR PERFORMANCE

Durability:	100,000 mating cycles
Insertion/Extraction Force:	1.5 ounce typical per contact
Operating Temperature:	-65° to 125°C
Current Rating:	2 amperes Hot swap 1 ampere maximum (load dependent)
Insulation Resistance:	5 gigaohms minimum Dielectric Withstanding
Voltage:	750 volts, 60 hertz, rms @ Sea Level 250 volts, 60 hertz, rms @ 70,000 feet Elevation
Solderability:	MIL-STD-202, Method 208
Salt Fog:	48 Hours IAW MIL-STD-1344, method 1001, test condition B
Humidity:	IAW MIL-STD-1344, method 1002, type II
Vibration:	4 hours in each of 3 mutually perpendicular axes IAW MIL-ST 1344, method 2005, test condition V, letter H
Shock:	1 shock along each of three mutually perpendicular axes IAW MIL-STD-1344, method 2004, test condition G
Data Rate (HSB ³):	Capable of 3.125 Gbps (consult Amphenol for arrangement)

FEATURES

FEATURES

Polarization:	"D" shaped design
Keying:	Optional keys offer 36 unique keying combinations
Guide Pins	Optional guide pins provide additional alignment
Radial Misalignment:	Capable of correcting up to a .020" initial radial misalignment
Angular Misalignment:	Capable of mating with up to a 2° initial angular misalignment

HIGH SPEED BRUSH (HSB³) SERIES 3.125 Gb/s

BENEFITS

- High speed configuration available that allows data rates up to 3.125 Gb/s via 100 ohm matched impedance differential pairs
 - Partially populated standard HDB³ mother board & daughter board bodies
- Contact a Sales Engineer for validation results.

MIL-DTL-55302 BRUSH CONTACT TECHNOLOGY - Catalog 12-035

Amphenol Bristle Brush Contact:
Multiple Strands of High Tensile Strength
Wires Bundled Together, Providing
Superior Electrical Connection with
Low Mating Force

HIGH PERFORMANCE LINE REPLACEABLE MODULE (LRM) Catalog 12-037

Amphenol LRM Surface Mount Connectors
meet the high density needs of today's inte-
grated electronic modules. Design versatility
and product reliability makes Amphenol the
premier choice for the system designer in
solving board interconnect requirements.

NEW

MEDICAL CABLE CONNECTOR

- Utilize high performance B³ brush contact
- 10 contacts per connector
- Plug – crimp removable contacts
- Receptacle – printed circuit board contacts
- Currently available in 12 colors, each with a unique keying combination (plug only, user is to provide key hole for receptacle)
- Also offered as partially populated
- Notches in plug connector to assist with over molding
