Next Station: Excellence
Excellence in Connectivity Solutions

HUBER+SUHNER is a leading international supplier of electrical and optical components and connectivity solutions for railway systems. This successful global company unites core competencies in Radio Frequency, Fiber Optic and Low Frequency technologies under one roof and offers a high-quality product range for the communication, transport and industrial markets.

Excellence in railway cable systems

The Railway Cable Systems unit of HUBER+SUHNER is equipped for every task in modern rail traffic, both technologically as well as geographically. HUBER+SUHNER’s many years of experience in the railway sector enables multidisciplinary and complex projects, thanks to qualified employees. The worldwide growth rates show that technological leadership is rewarded. Renowned market leaders throughout the world rely on the sophisticated services and benefit from the global production and sales network.
HUBER+SUHNER: Expertise without compromise
Global general contractor

Because the HUBER+SUHNER engineering team specialists have access to the comprehensive know-how of the entire Group, customers worldwide can rely on the cumulative expertise of a general contractor.

The Railway Cable Systems unit develops solutions focussed on specific customer requirements, which ensure a high level of safety and functionality. The holistic approach is repeatedly proven in national and international projects, thanks to the many years of expertise in project management, in system engineering as well as in prototype and series production.

In the field of cables, HUBER+SUHNER provides for constant optimisation of well-positioned products, such as RADOX® railway cables. At the same time the development of new, successful product families is purposefully advanced. Our extensive group-wide knowledge benefits all segments of the railway market: from underground trains and tramways, to locomotives as well as urban and high-speed trains.
The measure of the train constructor

**Complete inter-vehicle systems**
HUBER+SUHNER supplies complete inter-vehicle systems, which combine Radio Frequency, Fiber Optics and Low Frequency technologies in customised complete solutions. Cables or hybrid cable solutions, pre-assembled units, EMC-optimised solutions and cable systems designed to withstand high dynamic loading, satisfy even the highest demands and also prove their worth under extreme conditions.

**Cable systems for bogies**
Applications with increased requirements in the field of bogies have employed our innovative cable and cable system solutions for many years.

**Carriage cabling systems**
From cable assemblies to complex cable harnesses incorporating power, signal and communication lines: HUBER+SUHNER supplies everything from a single source. Optimised and certified processes ensure smooth project flows from development, sourcing and prototyping to series production.

Cables and cable systems for:

- Drive systems
- Wireless communications
- Lighting systems
- Control and safety systems
- Bogie, speed and brake sensors
Railcar and locomotive cabling
Solutions developed on the basis of build-to-print or together with our customer’s specialists satisfy customer requirements the world over.

Cabling of control and safety systems
HUBER+SUHNER takes charge of complete implementation, from procurement to the ready-to-connect and tested installation.

Switchgear cabinets
Customised, rail-worthy switchgear and distribution cabinets according to customer specifications form part of our comprehensive product portfolio.
Thoroughly convincing

High performance in every core
Public railway transport services are increasingly expected to offer networks with an ever-higher level of service and higher speeds, in the areas of both passenger and goods traffic. As a consequence, carriers and system integrators are permanently seeking new, more powerful solutions. The Railway Cable Systems unit is one of these solutions: locally developed, competently produced and delivered just in time.

Competitive edge through technology
Equipped with a range of advanced solutions from the HUBER+SUHNER product portfolio, the Railway Cable Systems unit ensures that its customers around the world maintain their edge in the marketplace. Innovative services ranging from cable assembly to the development of new products generate the added value that customers need to maintain their competitive edge in a highly competitive environment.

Success through qualified employees
Experienced engineers and project management specialists form the backbone of our organisation. In order to maintain its leadership, the HUBER+SUHNER is committed to its employees. Top performance has enabled the Group to rise to the illustrious circle of top employers in a number of countries. Examples include the distinction as Top Employers 2008 - Shanghai Region and the Top Job seal of quality in Germany.

Locally present, globally networked
The Railway Cable Systems unit of HUBER+SUHNER has an unique worldwide network with the most modern production and assembly sites as well as a customer-oriented sales organisation. The group companies and sales outlets guarantee local presence, whereby another approximately 100 qualified partners worldwide contribute to the optimisation of customer contact. The production and assembly sites for cable systems are located in Switzerland, Denmark, Poland, United Kingdom, China and India. This is supplemented by qualified partner companies, which strengthen the global presence.

Impressive products in three technologies

Low frequency
• RADOX® control and power cables
• RADOX® data bus cables
• RADOX® JUMPER cables

Radio frequency
• SENCITY® Rail antennas for trains including underground and suburban applications
• SENCITY® Avant antennas for trams and buses
• Trackside antennas
• Flame retardant train antennas
• Coaxial cables

Fiber optics
• Rail FO
• Masterline hybrid
Co-Design: the first choice for transport technologies

The comprehensive service package makes Railway Cable Systems simpler, quicker and more innovative
With five steps, HUBER+SUHNER accelerates the development and production process and thereby enables cost savings and additional innovations.

Step 1: Our expertise from the beginning
We are competent and understand the market requirements.
• Development of solution concepts
• Cable recommendations for the application
• Optimisation of cable routing
• Recommendation for the connection technology

Step 2: Efficient planning
We prepare your concepts for implementation like transforming 3D in 2D data.
• Overview and detail drawings
• Operating material lists
• Cable lists

Step 3: High-quality production
We impress with quality and in-house cable production.
• Wide diversity of products
• Made-to-order cable solutions available
• Compliance with international standards regarding fire protection
• Comprehensive testing

Step 4: Intelligent assembly
We consolidate the technological edge.
• Incorporation of company-owned international production sites
• Consistently high quality thanks to automated test systems
• Processing of internal and external logistics

Step 5: On-site installation
We comprehensively integrate the cable systems into the vehicles.
• Implementation on site through qualified personnel
• Transfer of knowledge to integration partners throughout the world
Quality from the concept through to production

Development and project planning
In an early project phase, Engineering and Project Management for the cable system are already integrated into the team together with our Sales. With this integrative approach, HUBER+SUHNER ensures that, right from the outset, customer specifications are correctly interpreted and implemented as desired.

In the concept phase, the following points are determined:
• Project goals and requirements as well as the associated documentation and project planning
• Milestones and gate reviews are fixed for verification and validation measures
• Monitoring cycles for tests and their acceptance criteria

In the process design phase, the production processes and the production control plans are established to ensure a reliable product quality. In addition, activities are continuously harmonised with the customer. This also includes a transparent communications and change management.

Sourcing
Suppliers are systematically selected and proactively developed. All partners work according to comparable quality principles. In addition, they are regularly audited according to the HUBER+SUHNER quality system. Careful component selection by Engineering and global product and component sourcing at attractive purchasing terms ensure optimised added value.

Production and testing
The global production sites of HUBER+SUHNER produce top quality and are certified to ISO 9001, ISO 14001 and IRIS. Our customers can rely on qualified teams who, with their expertise, tools and measuring instruments, provide for a high degree of customer satisfaction. For this purpose, HUBER+SUHNER relies on a consistent process-oriented production:
• Identification of the process steps
• Identification of the risks by FMEA
• Training modules and work instructions
• Monitoring on the basis of key figures
• Continuous improvement of processes through Continuous Improvement Process (CIP) and Corrective Action Tracking System (CATS)
• Skill management

Delivery
HUBER+SUHNER accompanies the customer from the first contact through to acceptance of the cable system. This means that, even in the early project phases, the customers are already very familiar with the new solution and benefit from a continuous transfer of knowledge.

Environmental policy
HUBER+SUHNER is committed to environmentally-friendly business activities and undertakes to continuously improve environmental performance.
• Reduced power consumption despite increased production
• Investments in building technologies in order to reduce emissions
• Improved waste recycling
• Permanent elimination of hazardous substances from existing products
• Development of innovative new products
Excellent practical connections

STADLER Rail AG

Services from HUBER+SUHNER.
- Project evaluation
- Development
- Production
- Logistics

Added value for STADLER Rail AG
- Customer-specifically developed RADOX® railway cables
- Tested and optimised solutions
- Quick responses to project changes
- Low project risks
- Just in time delivery
ALSTOM Transport

Services from HUBER+SUHNER.
- Development
- Production
- Logistics

Added value for ALSTOM Transport
- Customer-specifically developed RADOX® railway cables according to NFF standards
- Tested and optimised solutions
- Quick responses to project changes
- Low project risks
- Just in time delivery
BOMBARDIER Transportation

Services from HUBER+SUHNER.
- Development
- Production
- Logistics

Added value for BOMBARDIER Transportation
- Perfectly-coordinated HUBER+SUHNER products
- Tested and optimised solutions
- Cost-effective pre-assembled solutions
- Low project risks
- Just in time delivery
- Global production and sales network
SIEMENS AG

Services from HUBER+SUHNER.
- Development
- Production
- Logistics

Added value for SIEMENS AG
- Customer-specifically developed RADOX® railway cables
- Tested and optimised solutions
- System cable solutions for carriage transitions
- Low project risks
- Just in time delivery
